1

## • Risk-informed Communication

- *It involves effective communication of relevant information, such as warnings, forecasts, and risk assessments, to support decision-making and facilitate action to reduce risks and increase resilience.*
- *Is fundamental to disaster risk reduction (DRR) and climate action and plays a crucial role in preparing for, responding to, and recovering from disasters, as well as in promoting resilience.*

2

## • Importance of Strengthening Risk-informed Communication

- *The Sendai Framework for DRR - emphasizes timely, clear, and relevant communication.*
- *Spread of misinformation & disinformation calls for risk-informed communication.*
- *Essential for reducing uncertainty, promoting prevention, preparedness, response, and recovery*
- *UNDRR emphasizes the importance of risk-informed communication in crises management*
- *Important to promote*
  - ✓ *informed decision-making,*
  - ✓ *fosters community engagement,*
  - ✓ *coordination, and effective risk management strategies.*
- *A critical tool for building public awareness, trust, and social cohesion*
- *Promoting behavioral change and adoption of sustainable practices.*

3

## • The Role of Media in Risk-informed Communication

### The media plays a critical role in risk-informed communication

- They are essential sources of information for the public.
- Influence public perception and understanding of risks.
- *However*, media reporting can be sensationalized, inaccurate, and biased, leading to misinformation and disinformation.
- To promote risk-informed communication, media reporting should be evidence-based, balanced, accurate, timely, transparent, and culturally sensitive.

4

## • Guiding Principles Risk-informed Communication

- *Timeliness*
- *Clarity*
- *Accessibility*
- *Relevance*
- *Consistency and Coherence*
- *Transparency*
- *Participation*

5

## Challenges associated with traditional communication approaches

- *Often inadequate, failing to adequately address the complex nature of crises*
- *Limited resources*
- *Information overload*
- *Cultural and linguistic barriers.*
- *Limited access to information and time and resource constraints*
- *Limited capacity to interpret information*
- *Limited trust in sources of information*
- *Complexity and Uncertainty*
- *Often one-size-fits-all approach, providing generic information*
- *Different levels of awareness and language barrier*
- *Fragmented communication*
- *Misinformation and Disinformation*
- *Insufficient policy and legal framework*

6

## • Tools for Enhancing and Promoting Risk-informed Communication

- *Social Media Platforms*
- *Mass Media*
- *Mobile Applications*
- *Infographics and Visual Aids*
- *Community Meetings*
- *Use storytelling and narratives*
- *Information and communication technologies (ICTs)*
- *Geographic information systems (GIS):*
- *Risk Communication Plans*
- *Hotlines*
- *Surveys*
- *Public address systems sirens, and emergency alerts.*

7

## • Risk-Informed Communication Strategies

- ***Simple, clear and timely messaging/communication***
- ***Framing: use of language and images***
- ***Tailored Messaging: - customized to the needs of audience.***
- ***Appropriate and multi-channels of communication: e.g., social media etc.***
- ***Trustworthy sources***
- ***Two-way communication***
- ***Partnership and Collaboration***
- ***Building Trust and Credibility***
- ***Evidence-based communication***
- ***Leverage Innovative technology***
- ***Monitoring and Evaluation***
- ***Empathy and Respect***

8

## • Innovative Cases on Risk-informed Communication for DRR

### Risk-informed Communication for Crises Management in the US

- Use of *social media* during the 2017 Hurricane Harvey in the US.
- Hurricane Harvey was a Category 4 hurricane that caused *catastrophic flooding* and more than **100 deaths**.
- The Harris County Sheriff's Office in Texas utilized Twitter to provide real-time updates on the storm's progression and share critical information such as *evacuation orders, shelter locations, and emergency contact information*.
- This enabled the dissemination of vital information to audience, including those with limited access to traditional media channels.

8

## • Innovative Cases on Risk-informed Communication for DRR

### Risk-informed Communication for Crises Management in Indonesia

- The use of WhatsApp during the 2018 earthquake in Indonesia.
- On 28 Sept. 2018, an earthquake led 4,340 dead; 10,679 injured; 667 missing; 70,821 evacuated; 206,524 made refugees
- The Indonesian Red Cross Society used WhatsApp to provide **regular updates** on the situation and **share information on how to prepare for earthquakes**, including tips on building earthquake-resistant structures and **emergency contact information.**
- This approach proved effective in reaching a broad audience and facilitating communication between responders and affected communities

## • Innovative Cases on Risk-informed Communication for DRR

### Community Resilience Game in the Philippines

- The Community Resilience Game, developed by the **Philippine Red Cross**, is a **board game that simulates various disaster scenarios**, including earthquakes, floods, and typhoons.
- The board game that helps children to learn about multi-hazard disaster preparedness and prevention
- The game aims to educate players on the importance of preparedness and enable them to identify and mitigate risks in their communities

8

## • Innovative Cases on Risk-informed Communication for DRR

### The Climate Storytellers Project by UNDP

- *The Climate Storytellers Project, by the UNDP enables communities to share their stories of how climate change is affecting their lives and livelihoods.*
- *The project aims to raise awareness and promote action on climate change by providing a platform for communities to voice their concerns and engage with decision-makers*

### By Indigenous Creatives

Why do their voices matter? Listen to the answers.

## • Innovative Cases on Risk-informed Communication for DRR

### The 2019-2020 Australian bushfires

- *In 2019-2020, Australia experienced the worst bushfires in its history, resulting in significant environmental and economic impacts.*
- *The government implemented a risk-informed communication strategy to prepare and respond to the bushfires.*
- *The strategy included the use of social media, text messaging, and public meetings to share information about the bushfires and its potential impacts.*
- *Established a website to provide up-to-date information about the bushfires, including maps of the affected areas, evacuation orders, and safety instructions.*

8

## • Innovative Cases on Risk-informed Communication for DRR

### Community Radio called "Radio Gedeo" in Ethiopia

- A community radio has been used to enhance risk-informed communication for DRR.
- The Ethiopian Red Cross Society established a community radio station called "Radio Gedeo" in the Gedeo zone, which is prone to droughts and floods.
- Radio Gedeo provides real-time information on weather alerts, DRR measures, and emergency response procedures.
- The radio station also broadcasts local music and cultural programs to engage with the community

## • Innovative Cases on Risk-informed Communication for DRR

### Community-Based Early Warning Systems (CBEWS) for Landslides in Nepal

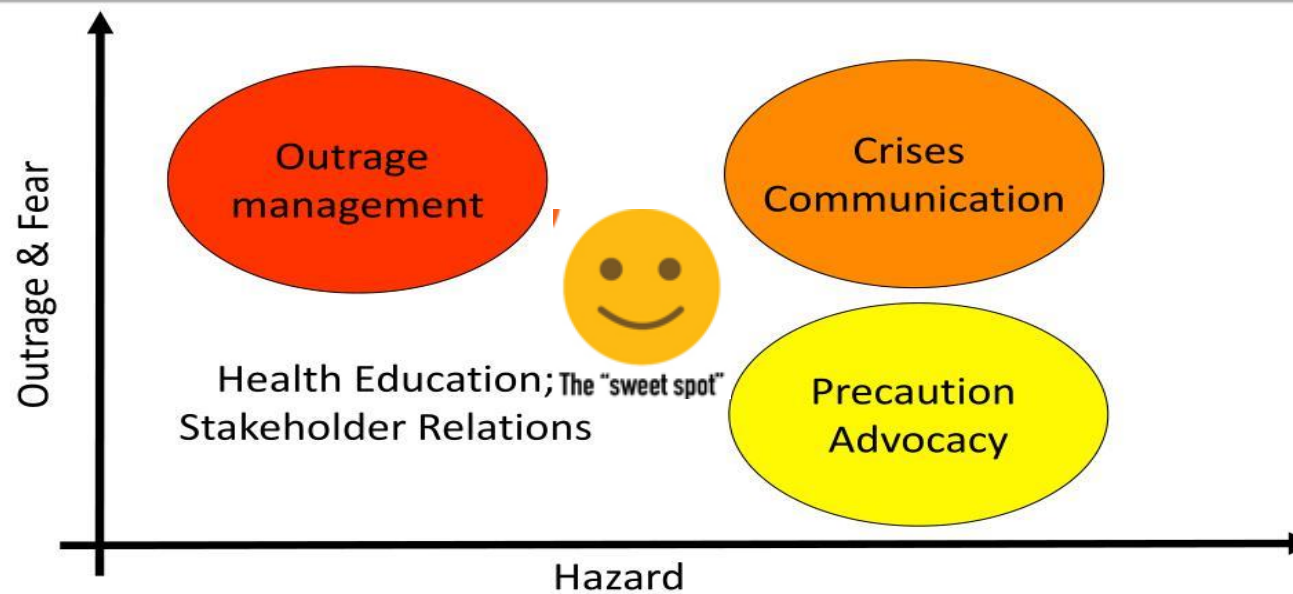

- CBEWS use local knowledge to identify and respond to hazards such as landslides.
- CBEWS has been used to reduce the impact of landslides and promote risk-informed communication.
- The system involves the installation of sensors to detect **landslides** and alert the community. The system is managed by local volunteers who are trained to respond to alerts and provide information to the public.
- The CBEWS has been successful in reducing the impact of landslides and promoting risk-informed communication.

9

- **Risk Perception and Communication Model (RPCM) by Peter M. Sandman and Jody Lanard**

## Risk Communication Strategies

10

## • Policy Recommendation for Risk-informed Communication

- *Tailor communication to communities cultural and linguistic context*
- *Prioritize participation*
- *Build collaborative networks through multi-stakeholder engagement*
- *Enhance communication capacity*
- *Develop risk-informed communication strategies*
- *Empower local communities and invest in capacity building*
- *Leverage technology*
- *Develop clear and consistent messaging*
- *Build trust and credibility*
